

Room 3 Curricular Information

Aug-Dec 2017

Literacy

We communicate in many ways in Room 3 and we are learning to work with our friends who communicate differently from the way we do. This can be tricky sometimes but we are doing a great job! Throughout the term we will be exploring lots of stories and rhymes, some we already know and some are brand new to us. Our topics will help us to share our ideas at circle time and we will use a variety of tools like our voices, picture cards and actions to share our thoughts and ideas.

Numeracy

Throughout the term we will be exploring numbers through songs, number challenges, matching games and many more fun tasks. When we are ready we will start to write/type our numbers and explore how many objects each number represents. Please help me to practise at home by reading numbers aloud with/for me, challenging me to find them in magazines and books or help me to spot them on a shopping trip.

Social Studies

This term the main topics we will be learning about are All About Me, People who help us, Nursery Rhymes and Fairytales.

H&W

Settling into our new routines, finding our way around the school and learning to look after our things. It's a lot to remember so we are practising every day.

Science

This term we will investigate how germs can make us sick and how important washing our hands is. Please help me to practise washing my hands carefully at home.

Expressive Arts

Dressing up as 'People who help us' and meeting our classroom visitors. The Lollipop lady will teach us how to cross the road safely.

RME

We are learning about our classroom rules and sharing with our friends. We must always have:

Kind hands
Kind feet
Kind words
